MOAB introduces Juniper Baryta Rag 305

100% Cotton true Baryta fine art inkjet paper, made in the USA

New York, NY (October 30, 2014) – Moab, a division of Legion Paper, the nation's premier paper company dedicated to the art of the fine print, is excited to announce the introduction of its new 100% cotton Juniper Baryta Rag 305.

The new Moab *Juniper Baryta Rag 305* is a 100% cotton, true baryta (barium sulfate) fiber paper that offers the density of a traditional darkroom FB-type paper to hold detail in the deep blacks of the shadow regions, while producing natural white highlights that's enhanced with a slight fiber glossy surface texture.

This double weight coated inkjet fine art paper embraces the unique charm of silver halide by using state-of-the-art coating technology to bring a new method to an old tradition.

Among the majestic buttes and mesas of Canyonlands stands the fibrous Juniper Tree, adding detail, color and contrast to the landscape that gave us inspiration for our new Baryta Rag.

This new family of paper expands on the range of Moab's premium 100% cotton papers made in the USA such as the renowned Entrada Rag family.

The new Juniper Baryta Rag 305 is available in 25 sheet boxes sized 5"x7", 8.5"x11", 13"x19", A2 and A4 - and rolls sized 17, 24 and 44 inches wide by 50 feet long. For more information, and free ICC profiles, please visit www.moabpaper.com.
